

Conifer seedlings and transplants

(Also see our balled conifers on pg. (5) for more conifer selection)

Quantity

PINE

Scotch Pine (*Pinus Sylvestris East anglia*)

Short needle pine with a rugged open form provides interest to the landscape. The pine that built all of Europe. *Fast growth60 feet*

Jack Pine (*Pinus*)

Fast growing important pulp wood species that will colonize a site quickly. Excellent for sandy dry areas *Fast growth60 feet*

Red Pine (*Pinus Resinosa*)

Fast growing lumber species that can really handle adverse environments. Also called Norway pine. *Fast growth...50-60 feet*

White Pine (*Pinus Strobus*)

Native 5 needle pine with a variety of uses. Timber, Christmas trees, windbreaks, wildlife habitat or as an ornamental. *Fast growth...80-100 feet*

SPRUCE

Colorado Blue Spruce (*Picea Pungens*)

Slow growing spruce with sharp needles, bluish color varies to dark green in seed propagated trees. Native to Colorado, very hardy. *Medium growth...50 feet*

White Spruce (*Picea Glauca*)

Hardy northern spruce with stiff bluish green needles. Symmetric growth. *Fast growth...50 feet*

Norway spruce (*Picea Abies*)

Fast growing species with dark green needles often used as windbreaks. Gracious hanging branches looking like Cyprus *Very fast growth...150 feet*

Black hill Spruce (*Picea Glauca densata*)

Dense, bluish green foliage, excellent screening and windbreak choice. Extremely hardy, as an ornamental it gives an alpine meadow effect. Symmetric growth, shows drought resistance. *Medium growth...20-40 feet*

FIRS

Balsam Fir (*Abies Balsamea*)

Soft, bright green needles, very popular Christmas tree. Needs very little shearing. *Fast growth...75 feet*

Fraser Fir (*Abies Fraseri*)

Very popular for Christmas trees. Good needle retention and soft, shiny, bright green needles. Beautiful symmetric landscape tree. *Medium growth...60 feet*

Hemlock

Canadian Hemlock (*Tsuga Canadensis*)

Also known as Eastern Hemlock, grows well in the shade where other conifers do not. Lustrous soft flat needles closely resemble balsam fir. Long lived species growing to immense size. Can be sheared to produce a thick dense crown, grows well in moist rich soils. *Medium growth... 125-150feet*

Cedar

Eastern Red Cedar (*Juniperus Virginiana*)

Dense pyramidal tree shears well, super tough ornamental or wildlife species. Small blue berry like cones are a great source of food for migrating birds, Deer will not eat this Cedar, Does well on sandy sites, tough as heck. Wood used for cedar chest. *Fast growth...20-30feet*

White cedar (*Thuja Occidentalis*) "Arborvitae"

Native to the eastern U.S. and Canada. Excellent for Screens, Wind breaks and wildlife habitat. Does well in poorly drained sites. Wood from Cedar does not rot making it preferred for outdoor construction. Bronze winter color. *Fast Growth...25-35 feet*

Larch

Tamarack (American larch) (*Larix Laricina*)

Native to northern US and Canada, thrives in boggy acidic soils often in pure stands. Narrow conical form, unique feathery needles that turn a brilliant gold in fall. *Fast growth ... 60 feet*

Hardwood seedlings and transplants

Quantity

	Age	Size	1-24	25-99	100+	500+	1000+
Silver Maple (Acer Saccarinum) One of your best picks for quick shade. Tolerates wet swampy ground. Light green leaves turn bright yellow in fall. <i>Very fast growth...120 feet</i>	1-0	12-28"	\$1.00	\$.50	\$.35	\$.25	\$.20
	2-0	36-60"	\$3.00	\$2.50	\$2.00	\$1.50	\$1.50
	4-0	3-7'	\$5.00	\$5.00	\$5.00	\$5.00	\$5.00
	2-0	12-18"	\$1.50	\$1.25	\$1.00	\$.90	\$.85
Red Maple (Acer rubrum) Grows well in moist bottom land. Excellent choice as ornamental, green leaves In summer, scarlet red to bright gold fall foliage is a real eye stopper. Valuable lumber species. <i>Medium growth...120 feet</i>	3-0	15-36"	\$2.00	\$1.75	\$1.50	\$1.25	\$1.00
	2-0	12-18"	\$1.25	\$1.00	\$.90	\$.80	\$.75
	2-0	12-18"	\$1.25	\$1.00	\$.90	\$.80	\$.75
White Birch (Betula Papyrifera) Most ornamental of all native birches. Chalk white bark peels in papery layers. Golden fall color, <i>Fast growth...80 feet</i>	1-0	12-18"	\$1.25	\$1.00	\$.90	\$.80	\$.75
	2-0	24-48"	\$3.00	\$1.75	\$1.25	\$.95	\$.90
River Birch (Betula Nigra) (single stem/tree) Excellent ornamental tree, very heat and cold tolerant. Resistant to insects that plague the white birch. Quickly replacing white birch as a valuable landscape tree. Exfoliating cinnamon to light creamy white bark. <i>Fast growth...90 feet</i>	1-0	10-18"	\$1.25	\$1.00	\$.90	\$.80	\$.75
	2-0	24-48"	\$2.50	\$2.00	\$1.50	\$1.25	\$1.00
Red Oak (Quercus Rubra) Hardy northern oak prized for its lumber and beneficial acorns. Dark waxy green leaves, beautiful fall color. <i>Medium to fast growth...80-100 feet</i>	1-0	4-16"	\$1.00	\$.75	\$.65	\$.55	\$.45
	2-0	8-30"	\$1.25	\$1.00	\$.75	\$.65	\$.60
	3-0	24-36"	\$2.00	\$1.75	\$1.50	\$1.25	\$1.00
	3-0	4+'	\$3.50	\$3.50	\$3.50	\$3.50	\$3.50
Swamp White Oak (quercus bicolor) One of the faster growing oaks. Forms large canopy, Prefers moist sites with some drought tolerance will also thrive on upland sites too. Fast acorn production for food plot, preferred by wildlife because it lacks the tannins found in acorns of the black oak family. <i>Medium to fast growth...80-100 feet</i>	2-0	12-18"	\$1.25	\$1.00	\$.95	\$.85	\$.80
	1-3	3-5'	\$5.00	\$5.00	\$5.00	\$5.00	\$5.00
Sandbar Willow (Salix exigua) A common native suckering shrub, quickly forms thickets, provides excellent Wildlife cover and deer forage. Can tolerate saturated heavy clay soils. <i>Fast growth...8-15 feet</i>	Rc-1	18-36"	\$2.00	\$1.75	\$1.50	\$1.50	\$1.50
	Rc-2	3-5'	\$5.00	\$3.50	\$3.00	\$3.00	\$3.00
White Oak (quercus alba) Large majestic form, valued for its water/rot proof lumber, oak wilt resistant as it will wall off the disease. Excellent acorn production, preferred by wildlife because it lacks the tannins found in acorns of the black oak family. <i>Medium growth...80 feet</i>	3-0	24-36"	\$2.50	\$2.00	\$1.50	\$1.25	\$1.00
	4-0	36-60"	\$3.50	\$3.00	\$2.50	\$2.00	\$1.75
Burr oak (Quercus macrocarpa) Impressive large tree for shade or wildlife feed, deer love their sweet nuts . Oak wilt resistant, more tolerant of harsh urban conditions than other oaks. Distinctive burred caps on acorns produces nuts early in life. <i>Medium to fast growth...80-100 feet</i>	1-0	2-12"	\$1.00	\$.50	\$.40	\$.30	\$.25
	3-0	24-40"	\$2.00	\$1.75	\$1.50	\$1.50	\$1.50
Hybrid Poplar (Imperial Carolina) or Soudland Pyramidal habit. Disease resistance and very vigorous This is <u>not</u> the short lived poplar of the past. Grow your own firewood. Growth, up to 8-10 feet per year. <i>Superfast growth...60-120 feet</i>	Rc-1	36-72"	\$2.50	\$2.00	\$1.75	\$1.50	\$1.25
	Rc-2	4-8'	\$5.00	\$5.00	\$5.00	\$5.00	\$5.00
Cottonwood (populus deltoides) Long lived vigorous parent of many a hybrid, this giant will often outpace these hybrids. Great large yard ornamental shade tree or quick forest cover and firewood producer. Food for caterpillars of butterflies in the Lepidoptera family Growth, up to 8-10 feet per year. <i>Superfast growth...60-120 feet</i>	Rc-1	24-48"	\$2.25	\$2.00	\$1.75	\$1.50	\$1.25
	Rc-2	4-8'	\$5.00	\$5.00	\$5.00	\$5.00	\$5.00

Conservation is a state of harmony between man and the land

Aldo Leopold

Habitat "100" Wildlife Pack

Take the guesswork out of planting a wind break or privacy screen, Habitat **100** is an adaptable selection of native hardwood, conifer and shrub species that will provide shade, protection, nesting and food for many birds and mammals as well as privacy and wind break for people. Planted in a 10 x 10 configuration, Habitat **100** will cover an area **100** feet long and 40 feet wide. If purchased individually this selection would cost over \$50.00... **you save \$25.00!** This year your pack will include Silver Maple, White Pine, White Spruce and Dogwood Shrub.

This pack out includes.....

- (10) Native hardwoods
 - (10) Native spruce
 - (10) Native pine
 - (10) Native shrubs
- And... A pack of root gel and planting instructions.

Fruit and nut includes shrubs and small trees

Quantity

	Age	Size	1-24	25-99	100+	500+	1000+
Black Walnut (<i>Juglans nigra</i>) Fast growing, popular hardwood tree, nuts are thick shelled and full flavored. Tolerates cold climates. Food for wildlife, a good shade tree and valuable lumber species. <i>Fast growth.....80 feet.</i>	1-0	8-24"	\$1.50	\$1.00	\$.95	\$.85	\$.65
Butternut (<i>Juglans cinerea</i>) Sold Out Resembles Black Walnut but smaller, Delicious hard shelled nuts have rich, oily, spicy flavor Favored by both man and beast, beautiful wood used for cabinetry and rifle stocks. <i>Fast growth.....60 feet</i>	1-0 2-0	6-20" 12-22"	\$1.50 \$2.50	\$1.25 \$1.75	\$1.15 \$1.50	\$.90 \$1.25	\$.85 \$1.00
Bitternut Hickory (<i>Carya cordiformis</i>) A versatile eastern hardwood with benefit to man and beast, grows well in poorly drained swamps to sterile uplands. Predictable heavy nut crops feed deer, squirrels and turkey throughout their range. Seed origin, collected in Wisconsin's Mississippi backwaters. <i>Medium growth.....50-75 feet</i>	3-0	8-20"	\$3.00	\$2.50	\$2.00	\$2.00	\$2.00
American Plum (<i>Prunus Americana</i>) Small tree, with profuse white sweet smelling flowers followed by sweet red plums and brilliant fall color. Seed collected here at pcn. Very hardy, benefits man and wildlife. <i>Medium growth.....20 feet</i>	1-0	12-18"	\$1.00	\$.95	\$.90	\$.85	\$.80
Antanovka Apple (<i>malus antanovka</i>) Antanovka is a group of late-fall or early-winter cultivars, a strong acid flavor that have been popular in Russia and in Poland, its popularity is explained by the Antanovka's ability to sustain long harsh winters typical of Eastern Europe and Russia and for its superior preservation qualities. Very heavy fruit production after 5 years, excellent apple for food plot and shelterbelt plantings as well as eating. <i>Fast growth.....40 feet</i>	1-2	2-4'	\$4.50	\$4.50	\$4.50	\$4.50	\$4.50
Renetka Crab (<i>malus renetka</i>) The best species crab we know of for vigor, productivity, disease resistance, hardiness and floral display. Dark waxy green leaves, an explosion of white flowers and a bumper crop of persistent dime size red fruit that feed a multitude of birds thru-out our long winters. Grows fast and straight and is a must have for birders and deer plots. <i>Fast growth ... 40 feet</i>	2-0	12-18"	\$1.50	\$1.25	\$1.00	\$.85	\$.75
Black Cherry (<i>prunus serotina</i>) Excellent ornamental, deep green leaves. Great food for wildlife, highly prized wood. Fruit used for preserves. <i>Medium growth... 60-70 feet</i>	1-0	12-18"	\$1.00	\$.95	\$.90	\$.85	\$.75
American Hazelnut (<i>corylus Americana</i>) A vigorous multi stemmed shrub, tolerant of varied soil types, dark green summer foliage turning bright yellow or burgundy in fall. Interesting floret type, seed pockets hold sweet filberts highly prized by man and beast. <i>Fast growth.....10 feet</i>	1-0 1-2	12-18" 15-30"	\$2.00 \$5.00	\$1.75 \$4.50	\$1.50 \$3.50	\$1.25 \$3.50	\$1.00 \$3.50
Nannyberry (<i>viburnum lentago</i>) Open shrub to small tree. Creamy white bloom clusters in spring yield a plethora of food for wildlife in fall. Tolerates drought and shade, does well on most soil types. <i>Fast growth.....20 feet</i>	1-0 1-3	12-18" 2-5'	\$1.75 \$5.00	\$1.50 \$5.00	\$1.25 \$5.00	\$1.10 \$5.00	\$1.00 \$5.00
Serviceberry "Saskatoon" (<i>amelanchier Alnifolia</i>) Masses of white, early spring flowers emerge before any trees leaf out, edible purple/red fruit in mid-summer, then bright yellow to red foliage in fall. A small multi stemmed specimen tree, does well in the shade, fruit production best in full sun however. <i>Medium growth.....25 feet</i>	2-0 1-3	10-20" 24-36"	\$1.00 \$2.50	\$.80 \$1.50	\$.70 \$1.25	\$.60 \$1.00	\$.50 \$1.00
High bush Cranberry (<i>Viburnum Trilobum</i>) White flowers in flat clusters in May. Beautiful lustrous green leaves followed by scarlet red fruit and leaves in fall. Returning spring migrants rely on fermented fruit. <i>Fast growth.....8-12 feet</i>	2-0 1-3	10-20" 16-30"	\$1.00 \$1.75	\$.95 \$1.50	\$.80 \$1.25	\$.75 \$1.10	\$.70 \$1.00
Silky Dogwood (<i>cornus amomum</i>) Dense growing shrub with red/maroon bark in winter. Clusters of beautiful white blossoms followed by purple fall berries, a major food source for migrating birds. Excellent browse for deer and edge planting. Dark green waxy leaves. Serves as good screening shrub, quick to establish, thick growth! <i>Fast growth.....9 feet</i>	1-0 2-0 1-1 1-2 1-3	6-12" 18-36" 12-30" 2-3' 4-6'	\$1.00 \$1.75 \$2.00 \$2.50 \$5.00	\$.65 \$1.50 \$1.75 \$2.00 \$4.50	\$.60 \$1.25 \$1.50 \$1.75 \$4.25	\$.55 \$1.00 \$1.25 \$1.50 \$4.00	\$.50 \$.75 \$1.00 \$1.50 \$4.00
Gray Dogwood (<i>cornus racemosa</i>) Thick lustrous waxy green leaves, clusters of white flowers and masses of interesting White berries on red stems feed a multitude of native birds and make this native a must have in any environment. Gorgeous burgundy fall color. <i>Fast growth.....8 feet</i>	2-0 1-2 1-3	15-30" 2-4' 4-6'	\$1.50 \$3.00 \$5.00	\$.85 \$2.50 \$4.50	\$.75 \$1.75 \$3.50	\$.65 \$1.25 \$3.50	\$.55 \$1.00 \$3.50
Red osier dogwood (<i>Cornus sericea</i>) Thick lustrous waxy green leaves, coral red stems, clusters of white flowers and masses of interesting Purple white berries are a favorite of cedar wax wing, blue birds and many others as they pass thru On their southward migration. Great deer cover and browse. <i>Fast growth.....8-15 feet</i>	1-0 1-2 1-3	15-30" 2-3' 4-6'	\$1.00 \$3.00 \$5.00	\$.65 \$2.50 \$4.50	\$.60 \$1.75 \$3.50	\$.55 \$1.25 \$3.50	\$.50 \$1.00 \$3.50
American Elderberry (<i>Sambucus Canadensis</i>) "New 2019" Pinnately compound leaves, large plumes of tiny flowers and masses of glossy black berries on red stems feed a multitude of native birds. Fruit useful in medicines, wine and jam making. Versatile shrub does best in full sun in nearly any soil type. <i>Fast growth.....10-15 feet</i>	rc-1	10-24"	\$1.75	\$1.75	\$1.75	\$1.75	\$1.75
Ninebark (<i>physocarpus opulifolius</i>) Masses of white flowers, atop a tough adaptable shrub that produces small seeds and cover Important to our native songbirds and great for deer cover. <i>Fast Growth..... 5-7 feet</i>	2-0 3-0	14-30" 18-36"	\$1.00 \$1.25	\$.95 \$1.00	\$.80 \$.90	\$.60 \$.80	\$.40 \$.75
Blueberry (Blue Crop) Beautiful pink/white flowers in May, Consistent yields of light sweet medium sized delicious fruit in August, Followed by a spectacular fire red explosion of color makes this the most popular variety, a must have for yard And garden. Plant in deep rich, slightly acidic soil that stays moist and is in full sun to maximize production. <i>Fast growth.....5-6 feet.</i>		10-16"				\$8.00	
Blueberry (Patriot) Touted as the sweetest, largest blueberry fruit of all, "Patriot" ripens (early) mid-July with heavy yields well into August Excellent as screening hedge, and as with all Blueberries, showy red fall color. Plant in deep rich, slightly acidic soil that stays moist and is in full sun to maximize production. <i>Fast growth.....3-5 feet</i>		10-16"				\$8.00	

Fruit Trees (large stock)

			Size	Each
Haralson Apple	Certified virus free (Semi Dwarf) m-7 rootstock An old stand by introduced in 1922. Haralson's tart complex flavor is great for eating fresh and is an excellent pie apple. Stores up to (5) months. Tree is easy to train for maximum biennial production	(bareroot)	11/16" caliper	\$25.00
Honeycrisp Apple	Certified virus free (Semi Dwarf) m-7 rootstock Crisp, juicy with excellent flavor, keeps in common storage up to 5 months. The new standard in eating apples, honeys are among the best.	(bareroot)	9/16" caliper	\$25.00
Snowsweet Apple	Certified virus free (Semi Dwarf) m-7 rootstock Fruit is slightly tart, sweet and savory. Apple is slow to turn brown once it has been exposed to the air. Great for eating or baking, heavy rind wards off bugs. (Our favorite)	(bareroot)	11/16" caliper	\$25.00
Frostbite Apple	Certified virus free (Semi Dwarf) m-7 rootstock A unique small apple with very sweet, intense taste. Crisp firm texture and juicy. Extremely cold hardy It is an excellent choice for northern regions. Parent to 'Keepsake' 'Sweet 16' and grandparent to 'Honey crisp'	(bareroot)	9/16" caliper	\$25.00
Red Regent Apple	Certified virus free (Semi Dwarf) m-7 rootstock Excellent northern apple super hardy, fruit is perfect combination of tart and sweet. Good fresh eating or cooking apple, stores well in cool dark cellar. Ripens in early October, a late Great for eating fresh or salads	(bareroot)	9/16" caliper	\$25.00
Zestar Apple	Certified virus free (Semi Dwarf) m-7 rootstock ***new 2019**** Exceptional flavor and crisp texture, much like its parent, Honeycrisp. Early ripening variety produces medium size Fruit perfect for snacks and kids lunches. The fruit has a good balance of sweet flavors and crisp juicy bite.	(bareroot)	11/16" caliper	\$25.00
KinderKrisp Apple	Certified virus free (Semi Dwarf) m-7 rootstock Sweet-tart flavor with a hint of brown sugar, super early (late August) ripening variety. Crisp texture Stores great for two months in the frig.	(bareroot)	11/16" caliper	\$25.00
Note: Most of our grafted apples are approximately 6-8' in height.				
Antonovka Apple (malus antanovka)	"an ton no ka" Antonovka is a group of late-fall or early-winter cultivars, a strong acid flavor that have been popular in Russia and in Poland, its popularity is explained by the Antonovka's ability to sustain long harsh winters Typical of Eastern Europe and Russia and for its superior preservation qualities. Very heavy fruit production after 5 years, excellent apple for deer food plot, shelterbelt plantings, As fresh eating and as "cross-pollinator" for our domesticated varieties. Fast growth.....25-40 feet	(bareroot)	2-4'	\$4.50

** Great value for deer food plot*

Fruit tree info....

- : Apple trees are graded according to stem diameter or (caliper), overall height of tree will vary from one cultivar to the next, in general however, most trees should be between 6-8'.
- : Apple planted in areas with heavy deer population need to be caged
- : Tree protectors are recommended to protect tree trunk from mice, voles, rabbits and weed whackers
- : M-7 rootstock is semi dwarfing with mature trees reaching 12-14' if left un-pruned
- : Spacing for apple should be about 15' x 15'
- : Two or more of the same variety of apple serve cross pollination needs, the Antanovka is an excellent choice also.

\$32.00 each

Fall Food Plot Blend
An easy to grow blend of Red Top Turnips, Rape and Chicory. We've found our custom blend to be an excellent food source for early season deer and turkey browse, with heavy yields of baseball size turnips that deer will browse throughout winter. See pictures on our web-site and facebook page. Great for holding deer in small concealed plots. Our 5lb. bag will seed about 22000 square feet (1/2 acre plot). Siting of plots near desirable plants or roadway where heavy deer damage is not welcomed, is discouraged.

\$3.00 each

Paint Creek Root Gel
Mix with water and dip roots before heading into the field, prevents trees from drying out until you get them in the ground. Gel wicks moisture from surrounding soil and makes it available to root zone in times of drought. (Free gel if you order 1000 or more seedlings) **1 OZ. enough for approximately 500 seedlings \$3.00**

\$.95 each

Tree protectors
24" UV resistant spiral trunk protectors are easy to put on, provide years of protection from mice, rabbits, weed whackers and sun scald. We recommend protectors for all of our hardwoods especially fruit trees, these are not tree tubes.

We sell gift certificates in any amount, call to order.

Large Conifers (balled in burlap and set in baskets) "Excellent quality and size"

White Spruce (Picea Glauca)

Hardy northern spruce with stiff bluish green needles. Great bird habitat and thermal cover for wildlife, thick symmetric growth. Fast growth ...75 feet

Black Hills Spruce (Picea glauca densata)

Slow growing compact tree. Bluish green foliage. Extremely hardy. As an ornamental it gives an alpine meadow effect. Symmetric growth .Short needle length...20-40 feet Medium growth...20-40'

White cedar (Thuja Occidentalis) "Arborvitae"

Native to the eastern U.S. and Canada. Excellent for Screens, windbreaks and wildlife habitat. Does well in poorly drained sites. Wood from Cedar does not rot thus making it preferred for outdoor construction. Bronze winter color. Fast Growth...25-35 feet

Norway Spruce (Picea Abies)

Fast growing species with dark green needles often used as windbreaks. Gracious hanging branches looking like Cyprus. Short needle length...150 feet

White Pine (Pinus Strobus)

Native(5) needle pine with a variety of uses. Timber, Christmas trees, windbreaks, wildlife habitat or as an ornamental. Fast grower...80-100 feet

Techny Arborvitae (Thuja Occidentalis Techny)

Dark green variation of our native arb. Excellent for Screens, windbreaks and wildlife habitat. Does well in poorly drained sites. Plant this one where a smaller tree is desired. Fast Growth...12-15 feet

Pricing

- : Spruce up to 5' are \$15.00/foot
- : Spruce 6' & over are \$20.00/foot
- : Cedar & Pine up to 5' are \$10.00/foot
- : Cedar & Pine 6' and over are \$15.00/foot

Example:

A 3 foot tall Spruce would be charged as follows..

$$3ft \times \$15.00 = \$45.00 \text{ each}$$

Hope for a green future is realized when we plant trees,

Pat McInnis

Trade info

We do not offer warranty on any stock we sell.

Drought conditions, pests and tree care, which are out of our control, make survival uncertain.

- : **Call first.....**We are predominantly a mail order / order and pick up operation, and encourage our customers to call ahead to place orders before stopping out: We do not have the staff on site for walk in sales. We are extremely busy in the spring "please" leave a message or an email and we'll get back to you asap. **Tree pick-up is welcomed and recommended. Pick up at 2858 n. 140th avenue, Cadott, Wis. 54727**
- : All stock, including large shade trees (but excluding balled conifers) are dug as bare-root and sold while stock is still dormant. Planting bare-root stock has proven to be an excellent way to handle these large and small hard-wood trees. They show excellent survival, save time and money, not to mention a lot of backaches.
- : We buy or collect most of our seed from the central forests of Wisconsin. This ensures that you are getting (hardy to zone 3 & 4) stock adapted to our areas brutal winters.

What does that mean?

- | | | |
|-------------|--|------------------------------|
| 1-0 | a seedling that has grown for one year in the seedbed. | This is a seedling. |
| 2-0 | a seedling that has grown for two years in seedbed. | This is a seedling. |
| 1-1 | a seedling for one year then transplanted and grown for one year in transplant bed. | This is a transplant. |
| 1-2 | a seedling for one year then transplanted and grown for two years in transplant bed. | This is a transplant. |
| rc-1 | a rooted cutting that has been in our propagation field for one year. | |
| rc-2 | a rooted cutting that has been in propagation field for 2 years. | |

Transplanting adds size, branching and root mass to seedlings and cuttings. Transplants are a excellent choice for plantings where larger plants are desirable. Our transplant stock is exceptional and a bargain for landscapers on a budget, Plant on difficult sites where weed competition is fierce for a head start with your planting.

Large Shade Trees

		<u>Quantity</u>			
		<u>Size in feet</u>	<u>1-5</u>	<u>6-10</u>	<u>11+</u>
Burr oak (Quercus macrocarpa)	Impressive large tree for shade or wildlife feed, deer love their sweet nuts . Oak wilt resistant, more tolerant of harsh urban conditions than other oaks. Distinctive burred caps on acorns produces nuts early in life. Medium to fast growth.....80-100 feet	Bare root 4-8'	\$10.00	\$10.00	\$10.00
Sugar Maple (Acer saccharum) "Hard Maple"	Grows well in rich upland soils. Excellent choice as an ornamental, a real eye stopper in fall with colors from brilliant gold to blaze orange to scarlet red. Known for high sugar sap used in maple syrup production. Valuable lumber species. Medium growth....120 feet	Bareroot lightly branched 2-5' Bareroot lightly branched 8-10' Balled in basket 2"+ caliper 10-20'	\$5.00 \$25.00 \$150.00	\$5.00 \$25.00 \$150.00	\$5.00 \$25.00 \$150.00
White Birch (Betula Papyfera)	Most ornamental of all native birches. Chalk white bark peels in papery layers. Golden fall color. Fast growth....80 feet	sold out			
River Birch (Betula Nigra)	Excellent ornamental tree, very heat and cold tolerant. Resistant to insects that plague the white birch quickly replacing white birch as a valuable landscape tree. Exfoliating cinnamon to light creamy white bark. Fast growth....90 feet	Bare root clumps 6-8'	\$12.00	\$12.00	\$12.00
Red Maple (Acer rubrum)	Grows well in moist bottom land. Excellent choice as ornamental, green leaves in summer, scarlet red fall foliage is a real eye stopper. Valuable lumber species. Medium growth....120 feet	Bareroot lightly branched 2-5' 5-8'	\$5.00 \$10.00	\$5.00 \$10.00	\$5.00 \$10.00
White Oak (Quercus alba)	Large majestic form, valued for its water/rot proof lumber, oak wilt resistant as it will wall off the disease. Excellent acorn production, preferred by wildlife because it lacks the tannins found in acorns of the black oak family. Medium growth.....80 feet	Bareroot 4-6'	\$5.00	\$5.00	\$5.00
Autumn Blaze Maple (Acer x Freemanii 'Jeffersred')	Upright broad oval habit, medium green summer foliage and spectacular scarlet red explosion in fall. This maple has excelled above all others in the nursery, showing excellent disease and insect resistance. Along with consistent growth, consistent confirmation whatever the soil or rain fall. Mature height x width 50' x 40'	(Bareroot) 3/4"+ caliper 10'+ (In Basket) 2"+ caliper 10-12'	\$38.00 \$150.00	\$38.00 \$150.00	\$38.00 \$150.00

Please order large shade trees early to ensure availability, we do not supply bare-root stock after bud break, all large shade trees must be picked up at the nursery.

Cultural Notes...

- : Plantings of conifers and adjacent fruit bearing shrubs provide essential cover and food for song birds and other wildlife.
- : Wind breaks slow fierce winter winds and reduce cooling cost in summer. A correctly placed windbreak can reduce energy needs by more than 10%.
- : Spacing for wind breaks can vary, however we recommend a double row of trees 6 feet apart and 8 feet between rows. A nice addition to this is a third row comprised of deciduous shrubs. 100 lineal feet / 6 feet x 3 rows = 50 trees
- : Spacing for Christmas trees 6x6=1210 trees/acre 8x8=680 trees/acre
- : Spacing for forestry plantings 8x8=680 trees/acre
- : Spacing for shrubs 3x3=4840/acre
- : Consult your local forester for expert advice before getting started.
- : Check out our web site (www.paintcreeknursery.com) for great links to loads of information on trees.
- : Weed control on young trees is essential ask us about how we deal with it

Terms: Orders under \$100 must be paid in full at time of order. All others require a 25% deposit with credit approval. Check or money order accepted. Estimated shipping cost is 15% (minimum \$10.00) of order + \$5.00 per box charge, Actual amount to be determined once order has been packed. Payment is due in full, prior to shipment. If your order is to be picked up please confirm pick up date one week in advance. All orders should designate the desired date of shipment if not indicated the shipment will be made at our discretion.

CLAIMS: All orders are accepted subject to prior sales, crop injury, inventory errors or loss beyond our control. Upon receiving your order, please unpack and report any damage to us immediately. Claims in writing must be made within 3 working days after arrival to be considered valid. Our liability does not exceed the original purchase price. Shipments travel at the risk and expense of the purchaser.

PRICES: Prices stated supersede all previous listings and are subject to change in whole or part without notice

SALES TAX: Wisconsin sales tax of 5.5% will be charged unless a Wisconsin re-sale certificate is provided at time of sale or is on file with us.

Paint Creek Nursery reserves the right to cancel any order, full payment will be returned within 60 days.

We do not offer warranty on any stock we sell. Drought conditions, pests and tree care, which are out of our control, make Survival uncertain.

We do sell out of many species early in the season, if you're ordering after March 1st you should e-mail or call to check inventory levels before sending your order. No stock will be reserved until we receive payment.
